

Automation is the Key to Successful DevOps

Having an expert DevOps team by your side is critical to ensuring a seamless delivery of your technology to achieve your business initiatives and goals. We understand the complex challenges of DevOps and have solved for many of the common pitfalls faced by companies. Streamlining processes, implementing top industry tools/solutions and working closely with your internal teams is what we do best.

Rapid change in the industry that include complex big data applications require cutting-edge solutions. We provide best-in-class technology solutions that automate DevOps principles and capabilities. MajorKey's DevOps Assessment Program focuses on analyzing the flow of data through each phase of the DevOps framework to deliver your software in a better, faster and stronger manner.

We know that high-performing DevOps organizations have a faster turnaround time, have fewer failures and faster recovery times—all of which can improve a company's brand image.

Our services provide:

- **A robust assessment** of the technologies that are working well and how they can be leveraged even further.
- **Proven and tested best practices** for your DevOps needs and team.
- **Uncovering of key technology gaps** that results from a lack of functionality with existing tools and manual processes.
- **Identification of key integrations** for enhancing the automation process within the DevOps framework.

Why Choose the MajorKey DevOps team?

Experience—With an established track record, we understand DevOps and what needs to be done.

Technology—We provide a best-in-class framework so we can deliver your software better, faster and stronger.

Partnerships—We maintain key relationships and partnerships with innovative solution providers.

Our team at MajorKey has a practice-based approach to address continuous DevOps delivery goals.

Contact MajorKey today to learn how we can put our deeply experienced DevOps team to work for you.
