

# Proactive Problem-Solving for IT Peace of Mind

Technology runs your business. It shouldn't run you. Get proactive problem-solving from the experts at MajorKey. With years of experience instituting best practices for some of the world's largest enterprises, we tailor our Managed Services specifically for your needs. Monitoring, development, support—we'll handle the technology so that you can handle your business.

## Customize your managed services with MajorKey.

Comfortably turn your attention to your customers while knowing that an experienced team is offering 24-hour, seven-days-a-week remote administration and support solutions. Customize your Managed Services by selecting innovative packaged components that make the most sense for your business. MajorKey manages your application environments, so that your resources are directed where they are needed most.

- **Around the world, around the clock.** Our global team of certified Managed Services professionals provides ongoing support and administrative capabilities, and our 24/7 Global Support Desk assists customized packages whenever you need help.
- **Dedicated professionals.** MajorKey's skilled, certified professionals harness the power of the SailPoint solution—guaranteeing their availability to you and consistent service management.
- **Proactive problem-solving.** Remote system monitoring automatically identifies and solves issues before they occur, so that you can confidently focus your attention on your business.
- **Security cures, not band-aids.** We triage security concerns and get to the root of complicated security issues by leveraging Managed Services, Front-Line Support and Field Services.

Get the peace of mind to focus on your mission by expanding your team to include the experts from MajorKey.
